

Bamboo Status of Lao PDR Welcome to the Best Practices on Bamboo Value Chain

By: Sounthone Ketphanh, DD of Forestry Science Research Center

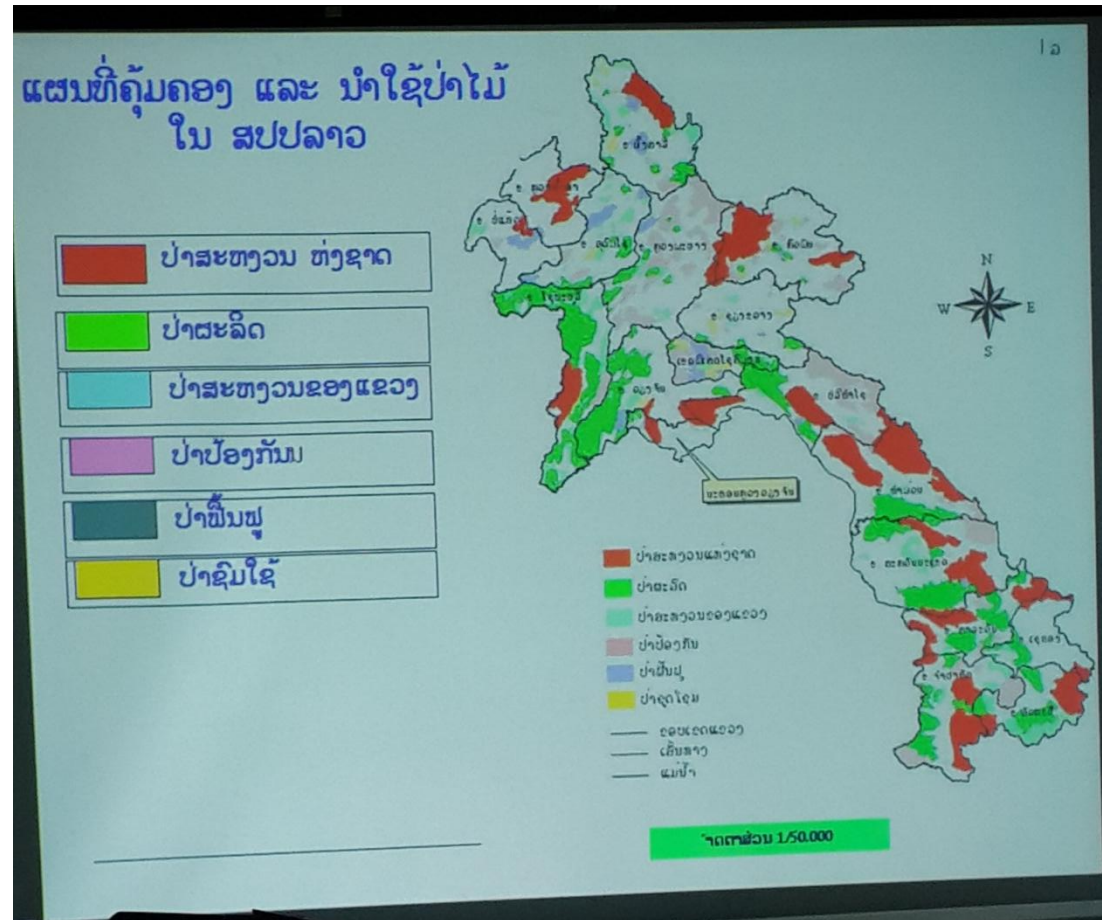

Presentation Overview

- BB status in Lao
- Research
- Policy
- Opportunity

BB status in Lao PDR

- Could be found in different forest Types,
- Most of them are in the status of natural resources,
- Traditional plantation in home garden of few species,
- Just plant some for Shoot production in last 10 y

BB status in Lao PDR (cont.)

- Not full uses (cane)
- Waste of natural resources
- Only some spp are used (canes)
- Most of the areas are still in open access: shoots and canes harvesting

BB Research

- Taxonomic studies in 1992-94 supported by IDRC:
 - ✓ 52 spp; 15 genera
 - ✓ Germplasm collection in FoF and FSRC: 9 spp
 - ✓ Specimen collection: in FSRC herbarium
- Small studies with the cooperation: FoF, Gret, WWF, GIZ

Research & Development

- Bitter Bamboo forests magt: 1996-2001, NAFRI/IUCN
- BB forest magt, recent with Gret in Huaphanh
- BB forest magt, recent with GIZ in Hin Nam No PA
- BB forest magt, last 5 y, with SNV in Sangthong D.
- Rattan & BB development with WWF (recent)

Policy of GoL

- Issue the annual quota for Shoots and Canes

	<u>Quantity (t) Year</u>				
	<u>2009</u>	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>
Bamboo shoots (t)	<u>640</u>	<u>452</u>	<u>985</u>	<u>213</u>	<u>3,100</u>
Bamboo canes (cane)	<u>800,000</u>	<u>2,910,000</u>	<u>1,822,000</u>	<u>889,000</u>	<u>2,163,000</u>

Source: DoF/MAF

Remark: these quantities are very far from the potential of the supply. The real uses would be up to 90% more in the all country.

Policy & Strategy (cont.)

- BB is recognized as NTFPs
- Support the magt, sustainable harvesting,
- BB is multipurpose uses in the all country and important item of NTFPs: food, tools, shelter, prevention of soil erosion and carbon sequester,...
- In full scale support the R & D of BB in this country

Policy & Strategy (cont.)

ລ/ດ	ປະເພດ	ຫົວໜ່ວຍ	ຄ່າຊັບພະຍາກອນ (ກີບ)	ຄ່າສິນຫະປູກໄມ້ (ກີບ)	ລວມເປັນກີບ (ກີບ)	ໝາຍເຫດ
1	ຊຸນ	ເສັ້ນ	12.000	1.000	13.000	ຄວາມຍາວ
2	ຫວານບົ່ມ	ເສັ້ນ	800	200	1.000	ບໍ່ເກີນ 0,5 ແມັດ
3	ໄມ້ຕົ້ວຈາກປ່າທຳມະຊາດ	ຫຼາ	6.000	1.000	7.000	
4	ໝາກດາວ	ກິໂລ	800	200	1.000	
5	ໄມ້ປ່ອງ	ຜ່າ	500	200	700	
6	ຂີ້ຊີ	ກິໂລ	500	200	700	
7	ເປືອກປົງ	ກິໂລ	800	200	1.000	
8	ເກືອແຂມ	ກິໂລ	3.000	500	3.500	
9	ຄອກແຂມ	ກິໂລ	200	100	300	
10	ໄມ້ສິນລວມ	ຫຼາ	4.000	500	4.500	
11	ໝາກແຫ້ງ	ກິໂລ	24.000	1.000	25.000	

ດັ່ງນັ້ນ, ຈຶ່ງໄດ້ຄິດໄລ່ຄ່າສິນຫະປະເພດເຄື່ອງປ່າຂອງຕົງ ໃຫ້ທຸກໝາກສ່ວນໄດ້ປະຕິບັດເປັນເອກະ
 ພາບກັນໃນທົ່ວແຂວງບໍລິຄໍາໄຊ.

ເຈົ້າແຂວງ - ແຂວງບໍລິຄໍາໄຊ

 ດຣ.ສຸວັນນີ ໄຊຍະນະ
 Dr. Souvanny XAYSANA

About BB:

- Resource tax: 500 kip
- Plantation: 200 kip

Total: 700 kip

- Some companies ask to buy BB by Kg, so it need to convert cane to kg (in the future ?).
- Difficulty: different spp & different size ??

Opportunities

- BB forests are still rich
 - Efficiently use
- Research on the morphology of some BB species
 - For more practical use
 - Sustainable uses and incentive for local/national income
- Magt practices
- Silviculture practices
 - To raise the BB production: shoots/cane

Q & A

Thanks for your attention
