- 4. ALiSEA Mandate**
- 5. How to Join ALiSEA Network?**
- 6. Summary Steps to become members**

## **Agroecology Learning Alliances in South East Asia**

Many and diverse ongoing initiatives and experiences contributing to Agroecology with a shared interest for bridging and synergizing these initiatives

ALiSEA : Open coalition of multi-stakeholders promoting a broad understanding of Agroecology (over 230 members in the 4 countries, Cambodia, Vietnam, Laos and Myanmar)

Answer need for knowledge exchange and experiences sharing

Foster interactions and create safe space for stakeholders

Increase visibility of agroecology of local initiatives

### **Goals**

# **Our Vision**

**An increased credibility and visibility of agroecology practices at family farmers, consumers and policy makers level spearheads the redesigning of the landscapes, the livelihoods and the mindscapes in the Mekong Region. Such regional agroecology transition supports the emergence of healthy and resilient food systems and the creation of innovative and fulfilling jobs for the rural youth while sustainably preserving natural resources.**

# **Our Mission**

**ALiSEA is a network of Agroecology practitioners and supporters (sharing and supporting common goals on AE) that actively engages its members into information/knowledge sharing and vibrant collective actions promoting an AE transition, and providing visible benefit for all participants. The network intends promoting a unifying agroecology concept for gaining higher visibility and influence, generating public support, and establishing a learning process to facilitate an agroecology transition in the region.**

# Objective

**ALiSEA is a network of Agroecology practitioners and supporters (sharing and supporting common goals on AE) that actively engages its members into information/knowledge sharing and vibrant collective actions promoting an AE transition, and providing visible benefit for all participants. The network intends promoting a unifying agroecology concept for gaining higher visibility and influence, generating public support, and establishing a learning process to facilitate an agroecology transition in the region.**
